**Cilji in kompetence:**

Ker retorika demografske krize 21. stoletja s pomočjo metafor o "izumiranju razvitega sveta", "smrti naroda", "reproaktivni lenobi mladih" zadržava prepletanje državnih, narodnih, rasnih, etničnih, spolnih in razrednih interesov, bodo študentke in študenti skozi predstavitev kratkega historiata preučevanja rodnosti in izsledkov, zlasti etnografskih študij, vpeljani v kompleksno problematiko prebivalstvenega

**Objectives and competences:**

Using sound metaphors about "dying out of the developed world", "the death of the nation", and the "reproductive laziness of the young generations", the rhetoric of the demographic crisis in the twenty-first century masks intertwined state, national, racial, ethnic, and class interests on the fertility issue. This course introduces students to the history of studying fertility as a constituent part of population

gibanja, tj. rodnosti, smrtnosti in migracij. Slušateljice in slušatelji bodo pridobili bolj poglobljena znanja in vpoglede v presoje in pristope demografske antropologije, ki se vedno bolj uveljavlja prav s presojo teoretično-metodoloških pomanjkljivosti obsežnih empiričnih raziskav.

dynamics: fertility, mortality, and migration. The students obtain insight into the theories and methodologies of demographical anthropology in the context of mainstream demographic approaches.

#### Predvideni študijski rezultati:

##### Razumevanje

- t.i. prebivalstvene problematike od teoretizacij Malthusa dalje;
- teoretizacij t.i. prvega, drugega in tretjega demografskega prehoda in njihove kritike;
- antropoloških konceptov in teoretizacij demografskega diskurza;
- antropološke pristope in metodologije preučevanja vsebin, povezanih s prebivalstvenim gibanjem

#### Intended learning outcomes:

##### Understanding of

- ‘population issue’ since the Malthus’s theorization;
- theorization of the first, second and third demographic transition and their critiques;
- anthropological concepts and theorization of demographic discourse;
- anthropological approaches and methodologies of studying themes related to population dynamics

#### Metode poučevanja in učenja:

##### Oblike dela:

- Frontalna oblika poučevanja  
 Delo v manjših skupinah oz. v dvojicah  
 Samostojno delo študentov  
 e-izobraževanje

##### Metode (načini) dela:

- Razlaga  
 Razgovor/ diskusija/debata  
 Delo z besedilom  
 Proučevanje primera  
 Igra vlog  
 Druge vrste nastopov študentov  
 Reševanje nalog  
 "Terenske vaje" (npr. obiski podjetij)  
 Vključevanje gostov iz prakse

#### Learning and teaching methods:

##### Types of learning/teaching:

- Frontal teaching  
 Work in smaller groups or pair work  
 Independent students work  
 e-learning

##### Teaching methods:

- Explanation  
 Conversation/discussion/debate  
 Work with texts  
 Case studies  
 Roleplay  
 Different presentation  
 Solving exercises  
 Field work (e.g. company visits)  
 Inviting guests from companies

#### Načini ocenjevanja:

Krajši pisni izdelki
Daljši pisni izdelki
Javni nastop ali predstavitev
Končno ocenjevanje (pisni/ustni izpit)
