Cilji in kompetence:

Cilj predmeta je razviti razumevanje procesov in praks spomina na socializem v post-socialističnih družbah ter raziskati njihov vpliv na sodobne družbene in kulturne diskurze. Študentke in študenti bodo pridobili kompetence za analizo spomina kot kulturne in diskurzivne prakse, ki omogoča zagovarjanje družbenih pozicij, strategij in moralnih vrednot v obdobju post-socialističnih transformacij. Poseben poudarek bo na individualnih izkušnjah in naracijah, ter njihovem prepletanju s kolektivnimi in »uradnimi« interpretacijami, kar bo omogočilo kritično razumevanje post-socialističnih transformacij in njihovih vplivov na osebno in družbeno življenje.

Objectives and competences:

The aim of this course is to develop an understanding of the processes and practices of remembering socialism in post-socialist societies and to explore their impact on contemporary social and cultural discourses. Students will acquire competences for analysing memory as a cultural and discursive practice that enables the justification of social positions, strategies, and moral values in the period of post-communist transformations. Special emphasis will be placed on individual experiences and narratives, and their interplay with collective and "official" interpretations, which will facilitate a critical understanding of post-socialist transformations and their impacts on personal and social life.

Predvideni študijski rezultati:

Slušatelji in slušateljice bodo znanje, pridobljeno pri predmetu, uporabili za izdelavo znanstvenega prispevka, ki lahko služi kot osnutek poglavja disertacije ali znanstvenega članka. Pri tem bodo razvili sposobnost kritične analize in interpretacije spominskih praks v post-socialističnem kontekstu, sposobnost sinteze pridobljenih informacij ter veščine akademskega pisanja, kar bo prispevalo k njihovemu znanstvenemu in strokovnemu razvoju.

Intended learning outcomes:

Students will use the knowledge acquired in the course to produce a scientific contribution that can serve as a draft of a dissertation chapter or a research article. In doing so, they will develop the ability to critically analyse and interpret memory practices in the post-socialist context, synthesise the acquired information, and enhance their academic writing skills, contributing to their scientific and professional development.
